Inolux
LED Design Made Simple

Product Highlight
IN-PI3210T(X)S5URGB
Addressable / Digital RGB LED

Applications:
IoT
Smart Wearables
Smart Home
Gaming
e-Mobility
Smart Tools
Networking

The IN-PI3210T(X)S5URGB series LEDs are side-view RGB components equipped with an integrated IC. These LEDs offer low power consumption and can generate a vast spectrum of colors, making them the ideal choice for several applications.

Inolux offers diverse digital LED alternatives, including ultra-compact and reverse-mounted devices boasting a range of luminous intensities and wavelengths.

Emission Color	Vf Typical	Wavelength (nm) Typical	Luminous Intensity (mcd) Typical @5mA
Red	2.0	624	60-120
Green	3.1	520	160-320
Blue	3.1	470	40-80
