

Features

- 0805 side view SMD LED
- High Brightness
- InGaN Technology
- Small package
- High reliability
- Clear Lens

Applications

- Consumer Electronics
- Wearable
- Automobile After Market
- Industrial Equipment

Description

The IN-S85CS5UW is a popular low profile 0805 side view package with versatile design capabilities. It is a PCB type molding style LED which can be used in various applications.

Recommended Solder Pattern

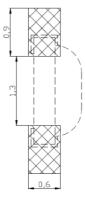

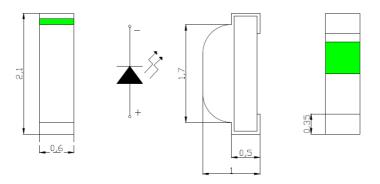

Figure 1. IN-S85CS5UW Solder Pattern

Package Dimensions in mm

Notes.

- 1. All dimensions are in millimeters.
- 2. Tolerance is \pm 0.1 mm unless otherwise noted

Figure 2. IN-S85CS5UW Package Dimensions

Absolute Maximum Rating at 25°C (Note 1)

| Product | Emission Color | P _d (mW) | I _F (mA) | I _{FP} * (mA) | V _R (V) | T _{OP} (°C) | T _{ST} (°C) |
|-------------|-------------------|---------------------|---------------------|------------------------|--------------------|----------------------|----------------------|
| IN-S85CS5UW | White | 80 | 25 | 100 | 5 | -30°C~+85°C | -40°C~+90°C |

Notes

1. Condition for IFP is pulse of 1/10 duty and 0.1msec width

ESD Precaution

ATTENTION: Electrostatic Discharge (ESD) protection

The symbol above denotes that ESD precaution is needed. ESD protection for GaP and AlGaAs based chips is necessary even though they are relatively safe in the presence of low static-electric discharge. Parts built with AllnGaP, GaN, or/and InGaN based chips are STATIC SENSITIVE devices. ESD precaution must be taken during design and assembly. If manual work or processing is needed, please ensure the device is adequately protected from ESD during the process.

Please be advised that normal static precautions should be taken in the handling and assembly of this device to prevent damage or degradation which

may be induced by electrostatic discharge (ESD).

Electrical Characteristics $T_A = 25\%$ (Note 1)

| | | | V _F (V) | | | λ(nm) | Viewing Angle | I [*] ∨(mcd) | |
|-------------|-------------------|---------------------|--------------------|-----|----------------------|---------------|------------------|-----------------------|------|
| Product | Emission Color | I _F (mA) | min | max | λ_{D} | λ_{P} | Δλ | 2θ1/2 | typ. |
| IN-S85CS5UW | White | 5 | 2.6 | 3.1 | Cx=0.295 Cy=0.300 | - | - | 120 | 230 |

Notes

Luminous Intensity (Iv) Bin:

| Bin | Luminous Intens | sity Range (mcd) | | | |
|------|-----------------|------------------|--|--|--|
| DIII | Minimum | Maximum | | | |
| M1 | 180 | 230 | | | |
| M2 | 230 | 285 | | | |
| N1 | 285 | 350 | | | |
| N2 | 350 | 450 | | | |

@5mA / Ta=25 $^{\circ}$ C, Tolerance: $\pm 10\%$

Forward Voltage (VF) Bin:

| Color | Bin Code | Spec. Range |
|-------|----------|-------------|
| | 5A | 2.6 – 2.7V |
| | 5B | 2.7 – 2.8V |
| Blue | 6A | 2.8 – 2.9V |
| | 6B | 2.9 – 3.0V |
| | 7A | 3.0 – 3.1V |

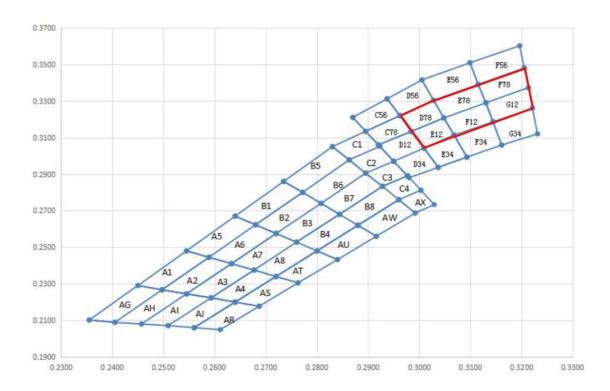

@5mA / Ta=25 $^{\circ}$ C, Tolerance: \pm 0.05 V

^{1.} Performance guaranteed only under conditions listed in above tables.

Packaging Information: 3000pcs Per Reel

Tape Dimension

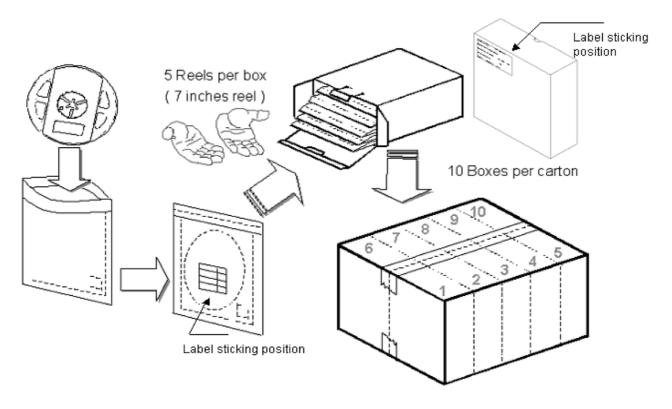

Reel Dimension

Packing Dimension

5 boxes per carton are available depending on shipment quantity.

| | Specification | Material | Quantity |
|--------------|----------------------|-----------------------------------|------------------|
| Carrier tape | Per EIA 481-1A specs | Conductive black tape | 3000pcs per reel |
| Reel | Per EIA 481-1A specs | Conductive black | |
| Label | IN standard | Paper | |
| Packing bag | 220x240mm | Aluminum laminated bag/ no-zipper | One reel per bag |
| Carton | IN standard | Paper | Non-specified |
| O (1 | | | |

Others:

Each immediate box consists of 5 reels. The 5 reels may not necessarily have the same lot number or the same bin combinations of Iv, λ_D and Vf. Each reel has a label identifying its specification; the immediate box consists of a product label as well.

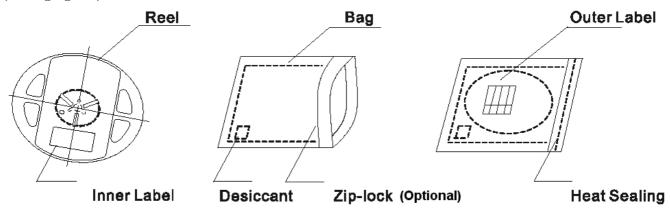

Dry Pack

All SMD optical devices are **MOISTURE SENSITIVE**. Avoid exposure to moisture at all times during transportation or storage. Every reel is packaged in a moisture protected anti-static bag. Each bag is properly sealed prior to shipment.

Upon request, a humidity indicator will be included in the moisture protected anti-static bag prior to shipment.

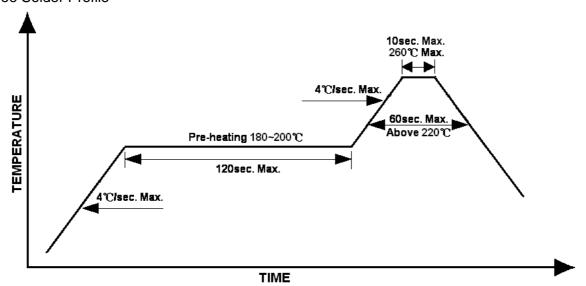

The packaging sequence is as follows:

Reflow Soldering

- Recommended tin glue specifications: melting temperature in the range of 178~192 °C
- The recommended reflow soldering profile is as follows (temperatures indicated are as measured on the surface of the LED resin):

Lead-free Solder Profile

Precautions

- Avoid exposure to moisture at all times during transportation or storage.
- Anti-Static precaution must be taken when handling GaN, InGaN, and AllnGaP products.
- It is suggested to connect the unit with a current limiting resistor of the proper size. Avoid applying a reverse voltage.
- Avoid operation beyond the limits as specified by the absolute maximum ratings.
- Avoid direct contact with the surface through which the LED emits light.
- If possible, assemble the unit in a clean room or dust-free environment.

Reworking

- Rework should be completed within 5 seconds under 260 °C.
- The iron tip must not come in contact with the copper foil.
- Twin-head type is preferred.

Cleaning

Following are cleaning procedures after soldering:

- An alcohol-based solvent such as isopropyl alcohol (IPA) is recommended.
- Temperature x Time should be 50°C x 30sec. or <30°C x 3min
- Ultra sonic cleaning: < 15W/ bath; bath volume ≤ 1liter
- Curing: 100 °C max, <3min

Cautions of Pick and Place

- Avoid stress on the resin at elevated temperature.
- Avoid rubbing or scraping the resin by any object.
- Electro-static may cause damage to the component. Please ensure that the equipment is properly grounded. Use of an ionizer fan is recommended.

DISCLAIMER

INOLUX reserves the right to make changes without further notice to any products herein to improve reliability, function or design. INOLUX does not assume any liability arising out of the application or use of any product or circuit described herein; neither does it convey any license under its patent rights, nor the rights of others.

LIFE SUPPORT POLICY

INOLUX's products are not authorized for use as critical components in life support devices or systems without the express written approval of the President of INOLUX or INOLUX CORPORATION. As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
- 2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
